

Carroll Soil & Water Conservation District Soil Testing Agreement

The Carroll Soil & Water Conservation District offers soil testing as a service to agricultural producers in Carroll County. District staff will collect samples after being provided a list of fields by producers.

- Soil samples will cost \$20 per sample, payable to Carroll SWCD.
- Fields over 20 acres will require multiple samples and will be determined prior to testing.
- Samples will be pulled as staff time allows, during either the spring or fall of the year.
- A& L Great Lakes laboratory will be used for testing.
- Results from the lab will be provided to the producer following submission.
- If the producer would like results shared with a third party (ie: agronomist) please indicate below for permission. Otherwise, it is the responsibility of the producer to share their results.
- Producers may request a Nutrient Management Plan (NMP) with additional recommendations specific to their farm at NO ADDITIONAL CHARGE.
- Manure samples (if requesting NMP using manure as fertilizer) will be the responsibility of the producer to submit to a lab and provide results to Carroll SWCD.
- Participation in this program grants Carroll SWCD permission to maintain soil test information and utilize it for educational purposes.
